DETAILED ACTION

Election/Restrictions

1. Restriction to one for following inventions is required under 35 U.S.C. 121:

- I. Claim 1-10 are drawn to invoking combing threes, classified in class 717, subclass 144.
- II. Claim 11-20 are drawn to invoking traversing an event filtering three, classified in class 709, subclass 318.

The inventions are distinct, each from the other because of the following reasons.

Invention II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I had ~~had~~ separate utility such as dynamic linking without using load balancing, and invention II has separate utility such as load balancing without using dynamic linking. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different searches and their recognized divergent subject matter, and the search required for group I is not required for group II, restriction for examination purposes as indicated is proper.
